Project Design Phase-II Solution Requirements (Functional & Non-functional)

Date	15th October 2022
Team ID	PNT2022TMID08788
Project Name	Project – Cloud based Web Application for
	Inventory Management
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form
		Registration through Gmail
		Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email
		Confirmation via OTP
FR-3	Statistical Data	The Statistical data about the products in the inventory
		are displayed in the application.
FR-4	Updating the product data	The product data is updated regularly when stock is
		bought are moved out.
FR-5	Notification	When the product ran out or overflowing an email will
		be sent to the admin asap.
FR-6	Searching/reporting	Users can look up information about the product
	requirements	availability in the Inventory
FR-7	Virtual Assistants	A virtual assistant is a software agent that provide
		services on behalf of a person in response to commands
		or inquiry

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should be user friendly and good-
		looking user-interface and should be easy to use the application
NFR-2	Security	The security requirements deal with the primary
		security. Only authorized users can access the
		system with user name and password of
		administrator.
NFR-3	Reliability	If Any information is inaccurate, it will cause big
		issues. The Application should be made in such a
		way that it is reliable in its operations and for
		securing the sensitive details.
NFR-4	Performance	The performance of the application is more
		important that the user should not face any lag or

		problem regarding application. So, the performance of the application should be high.
NFR-5	Availability	The availability of the application should anytime, the user can use the application in emergency whenever it can be. So, the application should work 24/7.
NFR-6	Scalability	The application has the ability to handle growing numbers of users and load without compromising on performance and causing disruptions to user experience.
